Masayoshi Esashi received the B.E. degree in electronic engineering in 1971 and the Doctor of Engineering degree in 1976 at Tohoku University. He served as a research associate from 1976 and an associate professor from 1981 in Tohoku University. Since 1990 he has been a professor and he is now in The World Premier International Research Center Initiative for Atom. Molecule. Materials, Tohoku University, (TU-WPI) and director of Micro/Nanomachining Research & Education Center (Micro/Nano Center (MNC)) in Graduate School of Engineering in Tohoku University. He has been studying microsensors and micromachined integrated systems (MEMS).
